Introduction Company

Welcome to PT Fokus Alam Nusantara: **Your Partner for Indonesian Kratom**

Based in the heart of West Kalimantan, the world's most renowned region for kratom cultivation, PT Fokus Alam Nusantara is a leading B2B supplier dedicated to the global market. We specialize in the ethical cultivation, meticulous processing, and reliable export of premium kratom.

Our commitment is simple: To deliver the world's finest sustainable kratom by seamlessly integrating product excellence with profound social and environmental responsibility. We achieve this by sourcing only premium, mature leaves from the lush forests of West Kalimantan and utilizing state-of-the-art processing techniques to guarantee unmatched purity and potency. Central to our mission is the empowerment of our local farming communities; we build lasting partnerships based on fair-trade principles, ensuring that our success contributes directly to the economic well-being and sustainable livelihoods of the people who are the true stewards of this natural resource.

What is Kratom?

Discover Kratom: Indonesia's Prized Botanical Treasure

Kratom (*Mitragyna speciosa*) is a tropical evergreen tree native to Southeast Asia and a member of the coffee family. For centuries, its leaves have been utilized in traditional wellness practices by indigenous communities. Today, Indonesia stands as the world's foremost supplier of high-quality kratom, thanks to its ideal equatorial climate and rich, fertile soil.

A Rich Heritage in Our Homeland

PT Fokus Alam Nusantara is strategically located in West Kalimantan, the epicenter of global kratom cultivation. The unique alkaloid profiles, primarily mitragynine and 7-hydroxymitragynine, found in the leaves from this region are renowned for their potency and quality. This is not just a product for us; it is part of our local heritage.

From Ethical Harvest to Global Export

The journey of our kratom begins with the ethical harvesting of mature leaves from thriving, wild-grown trees. These leaves then undergo a meticulous process of drying and curing to lock in their natural properties, followed by fine grinding. At every stage, we implement strict quality control to ensure the final product that reaches our B2B partners is pure, consistent, and meets the highest international standards.

Our Products

Super Green Kratom

Presenting Super Green Kratom from PT Fokus Alam Nusantara, our premier selection for the discerning global market. This strain represents the pinnacle of the Green Vein variety, sourced directly from the most mature trees in the fertile jungles of West Kalimantan.

Our "Super Green" is crafted exclusively from the largest and most vibrant leaves, which are hand-selected at their peak maturity. This careful selection process is believed to yield the richest concentration of natural alkaloids, resulting in a product of superior potency and quality. The leaves are expertly dried indoors to preserve their vivid green color and then ground into an ultra-fine, consistent powder.

Key Features:

Origin:

Single-origin from West Kalimantan, Indonesia.

Harvesting:

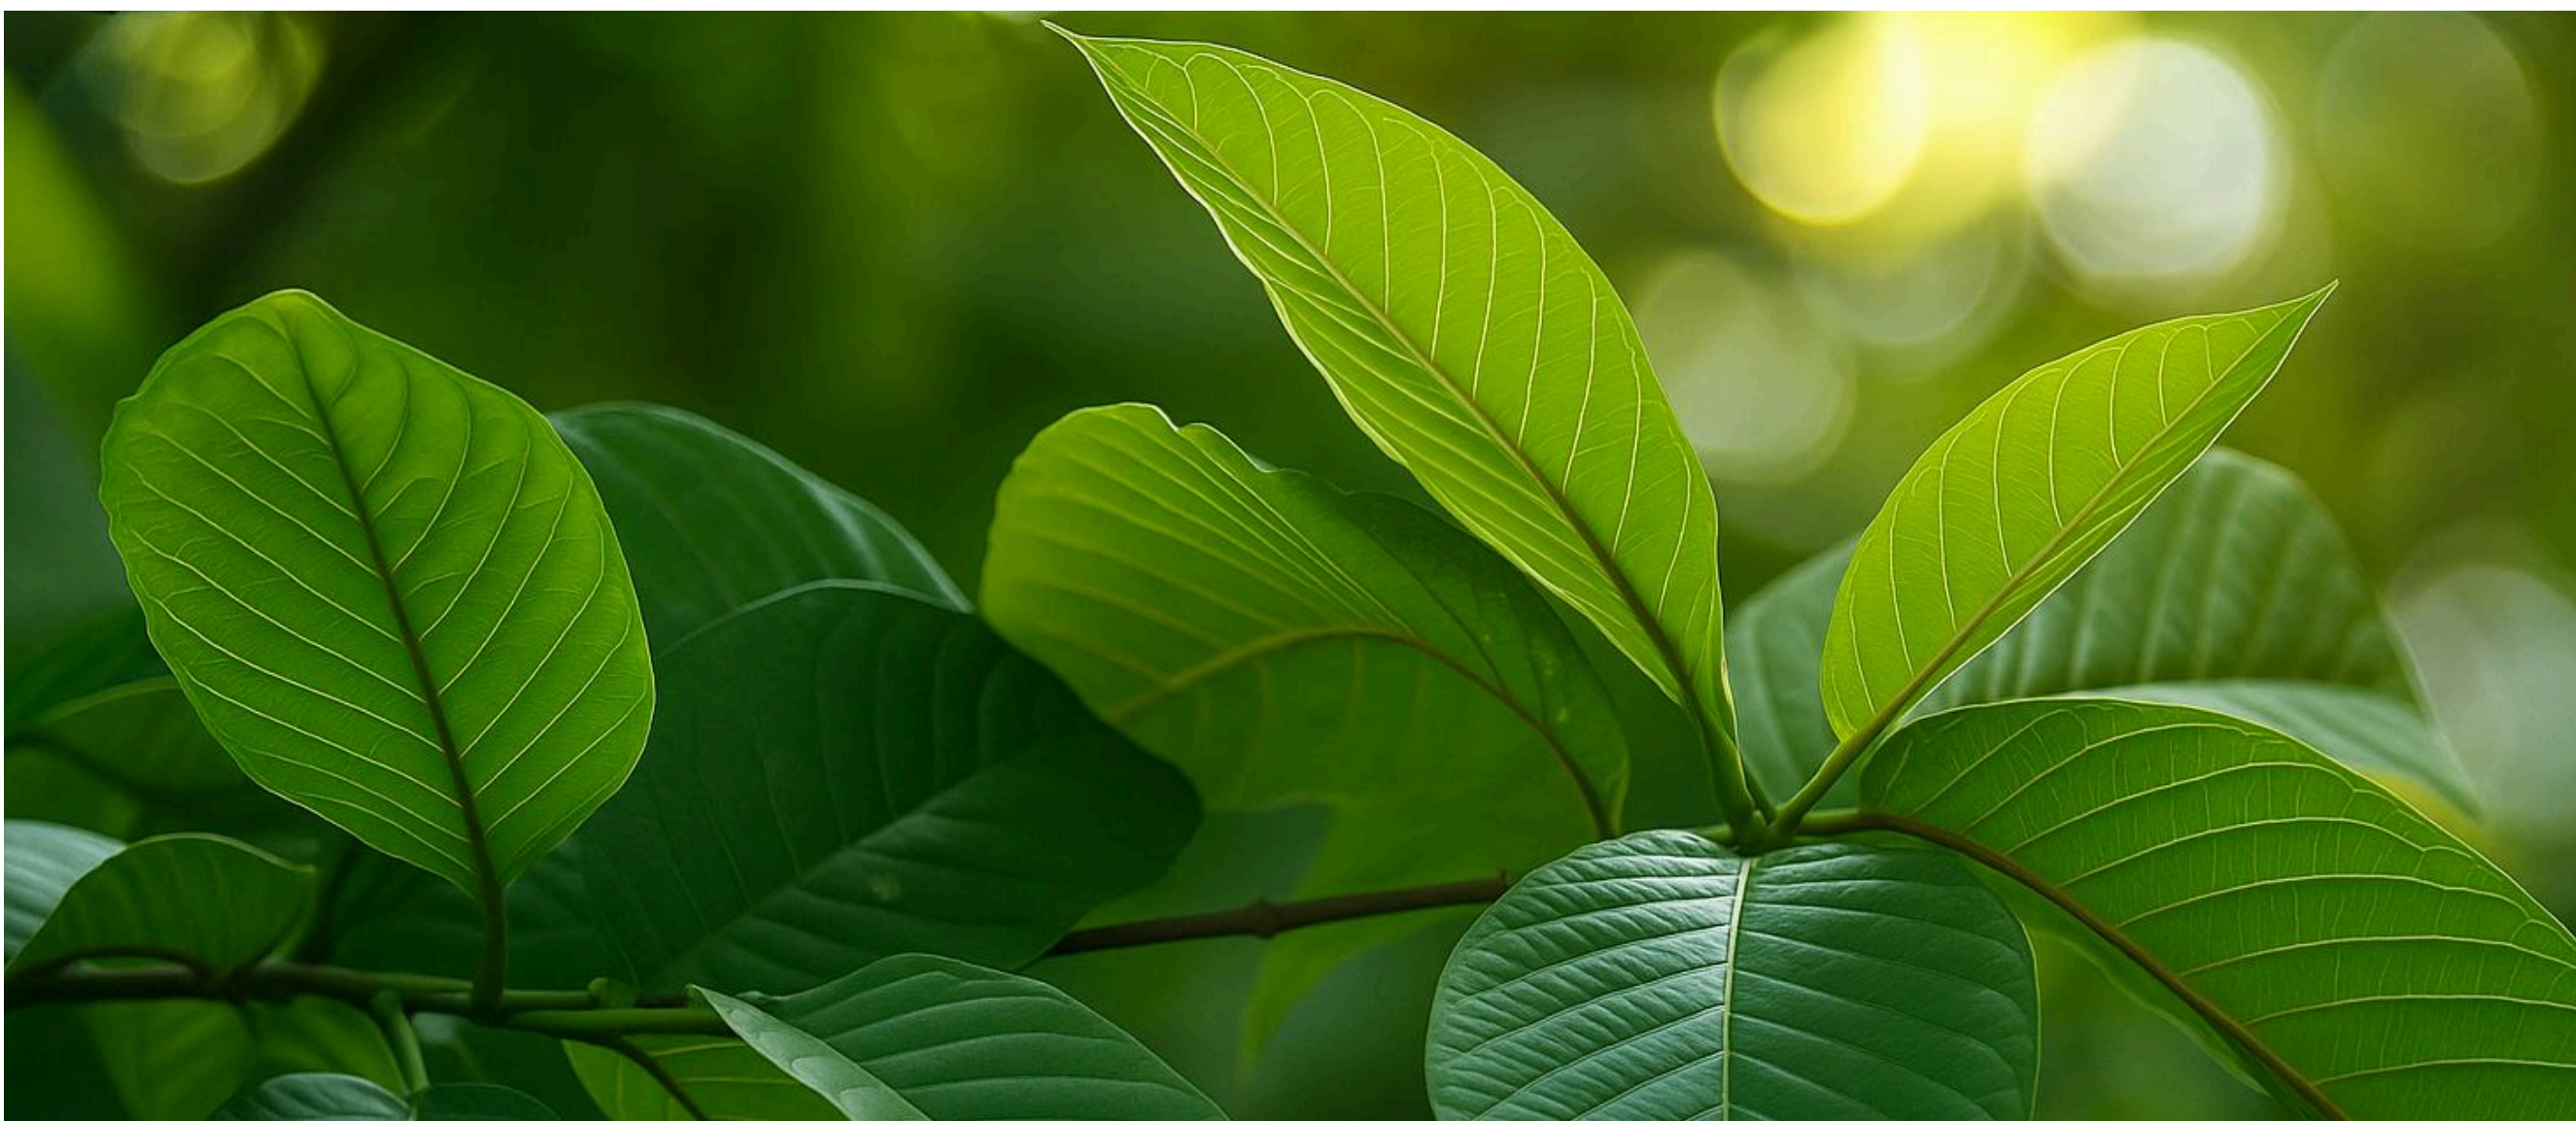

Selectively harvested from the largest, most mature leaves.

Profile:

A potent and remarkably balanced alkaloid profile, embodying the finest characteristics of the Green Vein family.

Appearance:

A vibrant, deep green color with a fine, silky texture.

Thank You
